

Sun A Choe

310-720-8422 | sunachoe@usc.edu | sunachoe-usc.github.io/sunachoe-portfolio/ | github.com/sunachoe-usc

Education

University of Southern California, Viterbi School of Engineering

GPA: 3.61 (Viterbi Dean's List)

Bachelor of Science, Computer Science

Aug 2022 - Dec 2025

Coursework: Data Structures & Algorithms, Full-Stack Web Dev, Theory of Computing, Intro to AI, Software Development, Game Programming, Professional C++, Embedded Systems, Internetworking, Intro to Operating Systems, Probability

Clubs and Activities: Organizer of AthenaHacks, Executive Board of KSEA, Executive Board of KOJOBS

Skills

Languages/frameworks/tools: C/C++, Swift, Python, GraphQL, Objective-C, Java, SQL, JavaScript, HTML, CSS, Mercurial, Git, Bootstrap, Android Studio, AJAX, PHP, Docker, React, SDL, Unix/Linux, Flutter, Dart

Other: Machine Learning, REST APIs, Data Analysis, Arduino, Web Crawling, Academic Research, LLMs & Prompt Engineering, Object-Oriented Programming, CI/CD Pipelines

Experience

Meta

New York, NY

Software Engineer Intern

May 2025 - Aug 2025

- Contributed to 0 → 1 messaging feature for Threads iOS, completing 5 table stakes features that shipped to 115 million daily active users
- Drove the full lifecycle for **Mark as Unread**, **Birthday UI Activation**, and **Sharesheet Null and Error states** from architectural design and implementation to launch with zero regressions
- Collaborated with cross-functional teams to proactively identify and resolve edge cases, ensuring a high-quality user experience in a fast-paced development cycle
- Gained proficiency in **Swift**, **Objective-C**, **GraphQL**, and **Mercurial** source control while working within a large-scale, enterprise codebase

Viterbi School of Engineering

Los Angeles, CA

Course Producer and Tutor for CSCI 170: Discrete Methods in Computer Science

Jan 2024 – Dec 2024

- Facilitated weekly office hours to assist ~300 students with homework and lecture content, graded assignments/exams, and provided constructive feedback to improve their understanding of complex algorithms and discrete math
- Refined course content, including homework assignments and exams, ensuring alignment with educational objectives

HuGraph

Seoul, South Korea

Backend Developer Intern

May 2023 - Jul 2023

- Developed **PostgreSQL** queries to process financial data, calculating technical indicators on a distributed web platform
- Automated financial data collection with **Python web crawlers** and **API** pipelines, improving data ingestion reliability
- Designed and deployed **CI/CD pipelines** using **GitHub** to accelerate development cycles and reduce manual errors
- Conducted research on security token valuation methodologies and delivered technical presentations, fostering team knowledge-sharing and aligning on potential integration strategies

Projects

GoHiking! (Flutter, Supabase, Dart, Google Maps API)

Sep 2024 - Dec 2024

- Built a cross-platform hiking companion app enabling users to search and explore hiking trails on an interactive map, view real-time weather, and read/write reviews
- Implemented user authentication, custom trail lists, and completed-trail tracking with **Supabase**
- Developed group activity and friends features, where users can join hikes, manage participation, and view friends' shared lists

Minesweeper (Java, Android Studio)

Sep 2024

- Developed a Minesweeper app with stopwatch, flag counter, and result page (win/loss) using **Java** in **Android Studio**
- Implemented efficient event handling for digging and flagging modes, dynamically updated UI, and added logic to reveal all mines when the game is lost, displaying results (win/loss) along with time after game completion

JoesStocks (Java, MySQL, HTML, CSS, JavaScript, API)

Apr 2024

- Created a stock exchange simulator web application where users can login to their personalized account and buy/sell stocks
- Utilized Finnhub's Stock **API** to fetch real-time stock data including high/low price, IPO date, market cap, etc
- Designed and implemented user-friendly interfaces using **HTML**, **CSS**, and **JavaScript**, ensuring a seamless experience for users navigating their personalized accounts.

Portal (C++, SDL library)

Apr 2024

- Developed Portal, a complex 3D video game using **C++** and the **SDL library**
- Integrated enhanced gameplay features such as quaternions, screen AI, actor parenting, voice-over, and camera transform
